How much time do people entering the job market in the Philippines spend on social media on average every day?

ChatGPT said:

As of the third quarter of 2024, internet users in the Philippines spent an average of 8 hours and 31 minutes per day online across various devices. While this figure encompasses all online activities, specific data on the average daily time spent solely on social media platforms by individuals entering the job market in the Philippines is not readily available. However, considering that social media usage constitutes a significant portion of online activity in the country, it's reasonable to infer that job seekers dedicate a substantial amount of their online time to social media platforms. How much time do you spend on your social media accounts every day?

How much time do you think that you must spend working every day to earn some significant extra money on the side, or to have enough money to support yourself and your family?

What are the average hours a person has to work in the Philippines every day to earn sufficient funds to support a family?

ChatGPT said:

In the Philippines, the standard workday is limited to 8 hours, as stipulated by the Labor Code. However, the number of hours a person needs to work daily to support a family depends on various factors, including the family's size, location, lifestyle, and the individual's wage rate. (Wikipedia) The minimum wage varies by region. For instance, in the National Capital Region (NCR), the minimum daily wage is ₱610. Assuming a 22-day work month, this amounts to approximately ₱13,420 monthly. (L&E Global) It's also worth noting that some individuals supplement their income through side jobs or entrepreneurial activities to meet their family's financial needs.

We will show you how you can reach all your goals using just a couple of minutes of your time a day on social media in the right way.

No money to invest, no special education or knowledge. Besides a Facebook account, the only thing that you really need is **a burning desire to achieve your personal goals now** – and a working relationship with us.

What do we do?

Why do we need you?

Why do you need to work with us?

Who we are and what we do. Our Background.

Who are we: A group of professionals with their own investments in the stock market. Some of our associates are multi-millionaires active on the stock markets since the 1970-ies.

What we do: Research for Opportunities on the Stock Market for our own group of people and sometimes also for investors on a private partnership basis.

The stock market is a platform where investors buy and sell shares of publicly traded companies. Anyone with sufficient savings can invest by opening a brokerage account and purchasing stocks. People invest in stocks to grow their wealth over time, benefit from dividends, and potentially earn profits as stock prices rise. It's a way to make money work for you, rather than letting it sit idle. To achieve this one needs to have special information and expert background knowledge.

For our own investments in the stock market, we must perform extensive market research.

Over the years, we had to become experts in scientific deep market research to be able to pick the best stocks for our own portfolios and to earn high profits. Based on such knowledge and expertise the people in our group make their own individual investment decisions. Last year most stock holdings of our members averaged 33% in profits. Some of the associates in our group earned even more. Now we can avail ourselves and this professional knowledge and research services to other private investors as well for them to also profit from our expertise.

Our clients: Rich private individuals with investments in stocks with the aim of increasing their wealth. These are usually professional businesses people who are not professional investors. They may own companies, or different kinds of businesses, are otherwise self-employed, or are already retired. They all are located outside of the Philippines.

Why do we need you? Why this Job Offer?

We need to reach out to qualified people who have an interest in the stock market and who could also benefit from our expertise and deep research work.

Target Audience:

- 1. Capital-Strong Private Investors – Many have accumulated wealth over decades, either through successful careers, entrepreneurial ventures, or inheritances. Their capital is typically invested in stocks, funds, or real estate.*
- 2. Risk-Aware & Security-Oriented – They prefer investments with predictable, sustainable returns. Highly volatile markets or speculative assets such as cryptocurrencies are generally unappealing. Stability and reliable dividends are key priorities.*
- 3. Investment Experience – Many have experience with stocks and financial products but are not necessarily experts in in-depth analysis or complex financial instruments. They appreciate professional research as a foundation for decision-making.*
- 4. Focus on Dividends & Value Stocks – Companies with strong balance sheets, stable cash flows, and attractive dividend yields are particularly appealing. Stocks in sectors like pharmaceuticals, energy, utilities, and blue-chip companies with strong market positions are of high interest.*
- 5. Future-Oriented but Cautious – These investors are open to innovation as long as the companies are financially solid. Growth stocks are considered if they offer clear and sustainable long-term prospects.*
- 6. Time & Convenience as Decision Factors – Many do not want to conduct daily market analysis themselves but seek a simple, well-founded basis for investment decisions. They are willing to pay for tailored research*

We aim to find these people on Facebook, with your help and a Facebook Group that you initiate and nurture with professional information that we provide you three times a week.

Calls to Action on our Website – Your source of income.

The targeted audience we seek to reach (through your activities and our website) are generally well settled, cash rich mature individuals in the later part of their lives. They usually do not want to spend all day long watching news about the Stock Market, or seek and expect flashy websites, but, from time to time, may want a decent and intelligent personal conversation about stocks and possibly get some clever and time-saving ideas and guidance to handle their investment portfolio better and to make their life easier. They all must be located outside of the Philippines. Otherwise, there is no country restriction. In line with this, we have created different Calls to Action on our website, each of them combined with an income possibility for you, on top of your guaranteed monthly base salary! The party interested will find three out of four CTAs are not connected to any kind of commitment or costs.

(A) Subscribe to our free newsletter 2-Minute-Essentials	You earn Euro 5.00
(B) Schedule an online Appointment to talk about our services at no cost	You earn Euro 5.00
(C) Download a sample copy of a “Scientific based Stock Research Study” which we make available for free	You earn Euro 5.00
(D) Clients can order and buy a “Scientific based Stock Research Study” at Euro 250.00	You earn Euro 100.00
(E) VAs can find others who want to work for us in the same way.	You earn Euro 100.00

All these CTAs require your unique, personal “Referral Number” to be stated so that you can be identified as the source for the action, and to be guaranteed your commission payment on each action.
